Master Planning of Resources

Explore and be able to apply the principles of demand management, sales and operations planning, master scheduling, and distribution planning, and to identify conditions that require action. This module evaluates knowledge of both supply and demand planning for mid- to long-term independent demand. Topics include:

- Recognizing all demands for goods and services to support the marketplace
- Bringing together all the plans for the business
- Disaggregating the production plan into an executable schedule
- Planning the distribution network and replenishment
